Dec 6, 2010 Ok, so this game was a find, I got it free and I really enjoy it. The premise is simple, you are in the airport control tower and its your job to make sure that planes land at the right location and take off at the right time. The player is tasked to collect Passengers and place them on the planes. The game is pretty hard to get started in but once you get the hang of how it works, it's really easy to fly around without issue. There's no in-game guide or tips (as far as I know), so it is a bit of a guessing game. Once you've figured out how to land and place the passengers, flying becomes fairly easy. There is a few different planes you can use and there is 4 different types of flights (Landing, Departure, Hold and Existence) so there is a bit of variety.
