## What's New In File Sanitizer For HP ProtectTools?

Files are stored as unstructured data in the operating system, and are commonly accessible to users. Such files may pose a threat to system security or confidential information. This software sanitizes file system items like documents, images, and other files to prevent sensitive data from being accidentally or maliciously extracted. After using this software, you can permanently delete files by selecting "Empty Cache/Permanently Delete Files" from the "Tasks" list. Information about malware and other security risks is also removed from files. The software can be used to clean temporary files, even after they have been deleted from the main computer. You can also employ this software to clean image files, audio files, and video files. The whole operation will be completed in the background, so you can use your computer normally. This software is one of the most secure and reliable applications that are available for the HP ProtectTools product.
